

- **Vision:**
- Inter-connectedness and Sustainable efforts to improve FESA services and “Unplanned for conditions” traffic management via efficient, safe, technologically intelligent and collaborative incorporation of NSSR Themes.
- NSSR stands for National Safety Social Responsibility

• **Critical thinking revisited:**

- Like how Rebuild, Rebound and Resurrect was the critical thinking in 2020 or so, it is now
- Insight Advancement for existing/emerging “need and dynamics”.

• **Mission:**

- Develop Focus Analytics based critical thinking for operational efficiency for FESA services
- and “unplanned for conditions” traffic management

Known dynamics influencing the NSSR Theme or FESA insightful Vision:

☐ Problems due to older road systems/ road infrastructure

☐ Problems due to lack of insightful / unified NOC effort by building/site/plot owners/associations along the road systems known to be used in FESA services

☐ Problems due to lack of NSSR Theme based landscaping of roads/road systems/routes known to be used in FESA services

☐ Problems due to lack of people interest for Essential Adherence for Guidance/Control/ Accountability for NOC efforts or for NSSR Theme landscaping of buildings/plots/sites/ Public services Infrastructure on roads/road systems/routes known to be used in FESA services

281

Solution deployment strategy for the NSSR Theme or FESA insightful Vision:

Stages of deployment based on

☐ (Chief Fire Officer Associated) Zones

☐ (Regional Fire Officer Associated) Regions

☐ (Fire Station Associated) Strategic-Tactical-Operational intelligence

☐ (soon to be GBA/BBMP/BBMP Traffic Engineering/BDA Associated) Wards

☐ (Ward Associated) Buildings/Road systems/Routes

☐ (FESA Associated) or (NSSR Theme Associated) Strategic-Tactical-Operational intelligence Infrastructure and/or Data Management

☐ (FESA Associated) or (NSSR Theme Associated) Focus Analytics

☐ (FESA Associated) or (NSSR Theme Associated) NOC Blocks (of Assets, Liabilities, Call to attention (C2A) viewpoints)

☐ (FESA Associated) or (NSSR Theme Associated) Services for incidences / problems

283

1. Quality Promotion for social responsibility themes

This begins with questions like - does the KSFES or coordinating departments for responsive, relevant, safe, agile, supportive, strategic and sustainable FESA, have initiatives, proposals and programmes for

1. QP/CQI Culture, and strategic alignment for social responsibility themes or NSSR themes like road safety guidance, Civic Amenity requirements, RADIUS of Coverage for critical services etc
2. QP/CQI Culture represents quality promotion , continual quality improvement for proven granularity, accountability and transformability at the macro and micro level via the use of relevant 4P(s) and 6M(s)
3. Strategic alignment relates to the improving of guidelines or standards like SERVQUAL, ISO 9004, Agile Management Methodology and editioning of NOC/NSSR Theme handbooks for quality,, safety, social responsibility and sustainable relationship management.
4. FESA: Fire and Emergency Services Actuation

2. Understanding of responsiveness / accountability

Understanding of responsiveness / accountability in FESA

- Fire and Emergency Services Actuation is a multi-factored concept that encompasses various aspects of planning, and organizing for mission critical and accountable service delivery, including reliability, responsiveness, agile management methodology assurance, empathy, and tangible FESA elements. These dimensions contribute to the KSFES endeavor and success.
- Key Dimensions of KSFES's FESA Quality with 4P(s) and 6M(s):
- **Reliability for SCRPO (Sustainable Clustered-Pincode Relationship Planning & Organization):**
- The ability of KSFES to perform the promised service accurately and on time.
- **Responsiveness for SCRPO:**
- The awareness-preparedness-readiness of KSFES to help people and provide prompt service.
- **Assurance for SCRPO:**
- The knowledge, courtesy, and ability of KSFES to inspire trust and confidence in people.
- **Empathy for SCRPO:**
- The caring and 4P(s) attention that the SFES provides to people.
- **Tangibles for SCRPO:**
- The quality and reliability of KSFES's facilities, vehicles. equipment, and the 6M(s) framework.
- KSFES's 4P(s) interrelated ease to respond to travel, evaluate, assist, mitigate or avail of landscape-density based FESA services.

4P(s)

Pincode
Provisioning
Place
Programmability

6M(s) like Manpower,
Methods, Measurements,
Metrics, Machines, Money for
SCRPO

1	The Karnataka State Fire and Emergency Services (KSFES) primarily focuses on firefighting, rescue operations, and disaster management. This includes saving lives and property from fires and other emergencies, conducting search and rescue operations, providing advice on fire safety, and enforcing fire safety measures in hazardous areas. They also play a crucial role in public awareness campaigns regarding fire prevention and safety.
2	NOC Evaluation and Issual Services
3	Building Evaluation services
4	Fire and Emergency Services – incidental or as drills
5	Responsiveness to Global/PAN India/Automobile Domain/Value-chain expectations for FESA with real-world influencers like road system understanding
6	FESA influencing Road safety practices - awareness, sensitization and relative preparedness
7	Knowledge management channels for social-responsibility-in-FESA influencing practices for road safety with interrelated thinking for understanding, safety & security, efficiency, FESA related well-being, cost effectiveness and if relevant real-world or perspective influencing imagery
8	Responsive and Evidential support by KSFES for incidental, more strategically afflicting experiences and everyday life
9	Surveyable incorporation of FESA influencing practices for strategic FESA and everyday interests
10	Strategic FESA Engagement and Responsiveness Management for allotted locations or for improved decision making
11	Relevant FESA Primary Work Planning, Organizing and Management
12	Recommended – Projectization for FESA Event Wheel Incorporation in social responsibility and call to attention needful planning and organization which focuses on evaluating and responding to QOI, QOP, QOS, QOO issues for, Key opinion Intelligence and FESA Clustered Pincode Intelligence for NSSR Themes

3. Understanding of the need or incidental need

Understanding of the need for fire and emergency services

- ✓ Urbanization / Target population
 - ✓ Demography
 - ✓ Landscape density
 - ✓ FESA trends
 - ✓ FESA satisfiers
 - ✓ FESA assistance for Health and Safety
 - ✓ Emerging Climate change issues or incidental interest in FESA
 - ✓ Processes and Procedures
 - ✓ KSFE's/ Clustered Pincode readiness to adapt, and adopt
- SCRPO* recommendations, guidelines and regulations. Refer WIP

Importance of Service Quality

- ☐ Landscape density Advantage
- ☐ NSSR Theme Performance
- ☐ Clustered Pincode Relationship Planning and Organization
- ☐ Clustered Pincode Performance
- ☐ Clustered Pincode Guidance/NOC

Measuring Service Quality

- ☐ SERVQUAL/ISO 9004
- ☐ More to Care Analysis (M2CA)
- ☐ Clustered Pincode Performance Surveys
- ☐ SCRPO Surveys
- ☐ Clustered Pincode Guidance/NOC

4. Understanding of Clustered Pincode Performance

5. Culture of National Safety Social Responsibilities (NSSR) – As FESA and Healthcare are associated

Trusted Emergence in National Safety Council programmes for Road Safety could mean

Designing and developing a culture for road safety with **Proven granularity, Accountability and Transformability** at the macro and micro levels.

Proven granularity could mean defining a NSSR for Road Safety Scorecard, where there is a commitment to incorporate a series of knowledge enabled exercises to sensitize, prepare, deploy, assess and monitor road safety practices adhered to at

- ☐ The **Dealer – KSFES + Healthcare Provider Network Model level**
- ☐ The **KSFES + Healthcare Provider Network's SCRPO level**
- ☐ The **Learning and Growth level** to help strategize NEXT steps for knowledge centric programmes
- ☐ The **Deep Interaction Link level** to help strategize alignment VIA CLUSTERD PINCODES/ISO 9004/AGILE MANAGEMENT METHODOLOGY for road safety in the KSFES VISION, MISSION AND, nature of ownership and nature of association at the SERVQUAL/4P(s)/6M(s)/FLT levels

ATTN: The mentioned Abbreviations mean

SERVQUAL: Service Quality Review for SCRPO

4P(s): Pincode, Provisioning, Place and Programmability for SCRPO

6M(s) : Manpower, Methods, Measurements, Metrics, Machines, Money for SCRPO

FLT: Forward Lifetime Theory for SCRPO

44

5.1 Culture of National Safety Social Responsibilities (NSSR) - As FESA and Healthcare are associated

Commitment to incorporate a series of knowledge enabled exercises to sensitize, prepare, deploy, assess and monitor road safety practices adhered to at

- ☐ The **Dealer – KSFES + Healthcare Provider Network Model level** by designing incorporations like the NSSR Handbook that is to be communicated about and given to the customer along with the brochures/handouts/booklets and relevantly ensured as NSSR by the KSFES + healthcare network
- ☐ The communications and reviews at the dealership level should be
 - ✓ About FESA card holder or personal Health and Safety
 - ✓ About solution finding to help the FESA card holder / person adapt, and adopt NSSR recommendations, guidelines and regulations specific to Road Safety specific to the KSFES, healthcare & digitization network and insights for SCRPO
- ☐ As FESA is not fixed for any severity level, the healthcare opted for may be as relevant: 2025 in the healthcare industry, customers increasingly expect personalized experiences, seamless More to Care incorporation and analytics, strong / secure relationship management, and proactive customer/patient support.
- ☐ Customers also value convenience, transparency, and a consistent experience across service locations or More to Care channels. Can the association between KSFES and Healthcare need focal synergy?
- ☐ AOEC explores the usefulness of a concept called SCRPO for the above and universal immersiveness.

17

5.2 Culture of National Safety Social Responsibilities (NSSR) - As FESA and Healthcare are associated

Commitment to incorporate a series of knowledge enabled exercises to sensitize, prepare, deploy, assess and monitor KSFES + More to Care (M2C) or NSSR Theme based road safety practices adhered to at

- ☐ The **Healthcare Provider/ KSFES / SCRPO level** by designing incorporations for the FESA card holder and healthcare network to survey, assess and report responses for
- ✓ Timely “needs-understanding” for SCRPO practices or enablers
- ✓ Timely incidence acknowledgment/management for SCRPO practices or enablers
- ✓ Record of incidences/complaints about SCRPO enabling incorporations, systems, products and services
- ✓ Record of KSFES / FESA + More to Care packaging defects of SCRPO enabling incorporations, systems, products and services
- ✓ The KSFES / FESA + More to Care packaging is being reviewed by the introduction of a FESA Safety and Responsibility Card and SCRPO score.

5.3 Culture of National Safety Social Responsibilities (NSSR) - As FESA and Healthcare are associated

Commitment to incorporate a series of knowledge enabled exercises to sensitize, prepare, deploy, assess and monitor KSFES/ FESA + More to Care or NSSR Theme based road safety practices adhered to at

- ☐ The **Learning and Growth level** to help strategize NEXT steps for knowledge centric programmes that rely on
- ✓ Appropriate organizational culture and sensitization for National Safety Social Responsibilities (NSSR), Connected Quality management, Connected Road Safety management, and Card holder/ Clustered Pincode Relationship Management for SCRPO
- ✓ Appropriate NSSR systemic assurance for standards, safety, quality, reliability, and responsiveness for needs, enablers, benefits analysis, incidences, complaints, feedback and/or competition

5.4 Culture of National Safety Social Responsibilities (NSSR) - As FESA and Healthcare are associated

Commitment to incorporate a series of knowledge enabled exercises to sensitize, prepare, deploy, assess and monitor road safety practices adhered to at

☐ The **Deep Interaction Link level** to help strategize alignment for KSFES/FESA + M2C or NSSR Themes for road safety in the nature of fleet/vehicle/commuting-option purchase or hire, nature of ownership and nature of association at the CRM/SCM/FLT levels for

- ✓ Excellent part/product/assembly engineering and ergonomics
- ✓ Right materials with test assurance
- ✓ Excellent design, aesthetics, and attention to detail
- ✓ Right for surveys/studies of NSSR specific Health & Safety (of the customer/consumer)
- ✓ Conducive purchase/ownership/maintenance influencers
- ✓ Conducive inventory turnover rate for fleet management / ownership
- ✓ Conducive NSSR surveys/studies/reports for Road Safety

Understanding Road Systems

- Every road has certain MIR assets and certain MIR liabilities, where MIR assets help road system utilization and performance, whereas MIR liabilities are always or sometimes hazardous if not suitable for a road configuration or can pose a risk to people using a road system.
- The MIR specification terms the following as **MIR assets**
- 1. Road configuration databases and/or cloud based systems
- 2. Traffic signals and traffic control systems
- 3. Disaster mitigation systems and Emergency Response systems
- 4. Defect liability based feedback systems
- 5. Planned Road signs, Billboards/Hoardings, Signages
- 6. Evolving **RADIUS of coverage Key Performance Indicators or KPI(s)**

Understanding Road Systems

- The MIR specification terms the following as **MIR liabilities**
- 1. Unplanned Lanes, Road Medians
- 2. Unplanned Bordering Road Barricades
- 3. Unplanned Speed breakers or Road Humps
- 4. Unplanned or poorly constructed Pavements
- 5. Poorly maintained Manholes & Sewer systems
- 6. Impediment causing Elevated or Tube Railway infrastructure
- 7. Unmanned or poorly maintained Railway crossings
- 8. Poorly maintained Bridges and Tunnels*
- 9. Poorly maintained Trees and Greenery
- 10. Hotspots (locations that need converged administration to address the need to mitigate climate change, rising pollution levels, rising CO2 levels, poor air quality, accident trends, traffic problems, incidences of crime, issues with road system arboriculture)
- 11. **No Road Infrastructure Transformation evaluations to minimize RADIUS OF COVERAGE inefficiencies**

Understanding Road Systems

- An MIR specification can balance MIR liabilities with MIR assets. To do this the specification will need to brainstorm for a new principle called “**RADIUS OF COVERAGE**” and “**defect liability**”, where the nature of planning, implementation, commissioning, performance **and SMART Resolution**, maintenance and/or reengineering are all evaluated via the need to perform reliably, effectively for route assurance for a specific radius of coverage, improve safety and mitigate hazard or risk.
- An MIR specification can integrate a Management index or defect liability indicator with each road system, where different parameters such as MTTD, MTTP, MTTN & MTTR and feedback loops all decide the balance.
- **Abbreviations and their meanings:**
 - MTTD: Mean Time to Detection MTTP: Mean Time to Prioritize
 - MTTN: Mean Time to Network needed Engineering infrastructure and resources
 - MTTR: Mean Time to Resolution
 - MTTCPQ: Mean Time to Cost of Poor Quality
 - MTAAR: Mean Time to Alpha Assistance Resolution (for afflicted or aged commuters)

- For the RS&A Network or departments, the **decision making for V2R effectiveness** can need to identify, assess and address
- 1. RS&A RCS Vehicle Parts/Components/Systems/Panels classification and codification
- 2. RS&A RCS V2R Process planning, Process variation
- 3. Discrete Events and RS&A PI factors
- 4. Human factors
- 5. Machine utilization factors
- 6. RS&A PI control/Process parameters
- 7. Movement / Motion study
- 8. SMART RS&A Packaging / V2R codification (basic functions)
- 9. Working range of RS&A Packaged workflows/lifecycles/processes/functions
- 10. Guidelines for RS&A PI conformity
- 11. Factors adding to RS&A Package Setup time
- 12. RS&A Packaged Workflow or V2R Lifecycle Sequence/EOCC Sequence
- 13. RS&A PI efficiency factors or V2R effectiveness
- 14. NADL standardized *Diagnostics to control variance in responsiveness - /improve RS&A packaging quality*

7

The Connected Dashboard/Report Model is simple and includes the tabulation of the following attribute specified via an excel spreadsheet

- (1) Package category: Descriptive name for the Package Code
- (2) Package Code: Package-provider-code or Package-Provider-code.Package-EOCCProvider-code
- (3) PrevV2R: V2R Effectiveness for the previous experiences
- (4) PrevV2RMin: Minimum Target Band for V2R Effectiveness for the previous experience
- (5) PrevV2RMax: Maximum Target Band for V2R Effectiveness for the previous experience
- (6) PrevV2RAmbiguity: Whether this Packaging for V2R effectiveness was clear or ambiguous
- (7) PrevV2RConsensus: Whether this Packaging for V2R effectiveness had a consensual agreement
- (8) PrevV2RAvailability: Whether this Packaging for V2R effectiveness was consistently available
- (9) CurrentV2R: V2R Effectiveness for the current year
- (10) CurrentV2RMin: Minimum Target Band for V2R Effectiveness for the current year
- (11) CurrentV2RMax: Maximum Target Band for V2R Effectiveness for the current year
- (12) CurrentV2RAmbiguity: Whether this Packaging for V2R effectiveness is clear or ambiguous
- (13) CurrentV2RConsensus: Whether this Packaging for V2R effectiveness has a consensual agreement
- (14) CurrentV2RAvailability: Whether this Packaging for V2R effectiveness is consistently available
- (15) FilterV2RTopic: Whether this Packaging for V2R effectiveness is mandatory or filtered for topic analytics
- (16) FilterV2RTopic-Subtopic: Whether this Packaging for V2R effectiveness is mandatory or filtered for topic-subtopic analytics
- (17) Dept-responsible-for-V2RTopic: The name of the department/team responsible for Packaging for V2R effectiveness for topic analytics
- (18) Dept-responsible-for-V2RTopic-Subtopic: The name of the department/team responsible for Packaging for V2R effectiveness for topic-subtopic analytics
