

Sites with or without NOC(s) from the KSFES will mostly need to report their sources of information for any fire emergency/fire incidence, as part of a FESA NOC culture

SITE EMERGENCY RESPONSE BOARD

The sources of information could be a Bulletin board with

1. A RS&A policy that is agreed upon
2. Details of the pincode and RADIUS OF COVERAGE for critical services that help / elevate the emergency
3. Details of the pincode and presence of nearby Civic Amenities that help / elevate the emergency
4. Details pf in-time FES call for help phone numbers or linked assistance phone numbers
5. Details of any Hour-glass rating that identifies the time of incidence reporting to immediate fire emergency/ fire protection and safety response
6. Details of any Hour-glass based FESA drills
7. Details of any Hour-glass based site/location/building evaluation plans
8. Details of any Hour-glass based public awareness campaigns or measures

Issue detection for RS&A/FES/FP&S

- 1.** Hour-glass based FESA drills
- 2.** Hour-glass based public awareness campaigns or measures
3. Agile growth and development in pincode/area/radius of coverage
4. Feedback or elevation from FES call for help phone numbers or linked assistance phone numbers
5. Perspective imagery from a road system (Condition Monitoring System) CMS installation
