DCAL Research Paper

(Highlights)

Use of Vehicle Safety Learning & Analytics for SMARTER commuting

B360 Bulletin Boards for SMART RS&A with the help of a universal QMS framework

RS&A Scenarios considered

- Maternity Care and Birthing
- Diagnostic Centre Home visits/company visits/camps
- Fire and Emergency Services
- Emergency response for incidences/risks/hazards/assistance

What if your RS&A department/ team, Channelized Connects for RS&A strategies, and RS&A drive/hybrid landscape performance dimensions (DPD) team, RS&A responsiveness analytics team is interested in improving your Vision to Reality Effectiveness?

A SMART RS&A/V2R QMS framework can help any effort conducted periodically, where your RS&A Process Improvement (RS&A-PI) group (a collective name) does the following:

- 1 Reviews its DPD / RS&A/V2R quality management system documents including the availability of standard operating procedures to improve quality of strategy and performance management;
- 2 Reviews its DPD / RS&A/V2R quality specific documentation to have a better understanding;
- 3 Carries out inspections of the vehicles used where SMART RS&A Packaged V2R/Regular RS&A V2R/important V2R effectiveness records, Channelized Connects for RS&A strategy reports, drive/hybrid landscape performance dimensions (DPD) reports of SMART RS&A Packages/regular RS&A(s) and their locations with V2R specific circumstances to have better knowledge of the responsiveness and effectiveness
- 4 Reviews and improves methodology to be adopted for quality assessment of the SMART RS&A Packaged V2R/Regular RS&A V2R Workflows/Lifecycles
- 5 Reviews and checks the preparedness of the SMART RS&A Package/Regular RS&A V2R quality management system to undergo readiness assessment;
- 6 Reviews the scope of quality management methodology and to ascertain the requirement of the number of DPD / SMART RS&A Package/Regular RS&A QMS objectiveness/key considerations to be met;
- 7 Makes clear to the RS&A-PI subscribing teams, the quality management methodology to be adopted;
- 8 Helps the RS&A-PI group implement continual quality improvement;

Proposal

Implement SMART RS&A Packaged / Regular RS&A V2R Convergence for a UNIVERSAL QMS in 2 steps

Step 1: Use **RS&A V2R norms and best practices (this document)**

Step 2: As “Knowing the DPD / SMART RS&A Package/Regular RS&A V2R methodologies” are emerging, the importance of which should be made evident to the RS&A network or department to provide QMS compliant responsive and effective services.

It is also proven that apart from the standard expectations set for the **Quality of outcome** in DPD / SMART RS&A Packaged/ Regular RS&A Packaged V2R Convergence, any V2R Responsiveness/Effectiveness, its QMS enabled diagnostics, and rating of quality levels also depend upon 3 or more factors:

1. Quality of Structure which includes the following

1.1 Quality assurance for SMART RS&A Packaged/Regular RS&A V2R Location, Layout and Assisting Facilities

1.2. Quality assurance for SMART RS&A Packaged/Regular RS&A V2R engineering technology, systems, equipment and devices used

2. Quality of Process or RS&A Process Efficiency

3. Quality of Management Accountability or SMART RS&A Packaging

4. Quality of methodical-assessments of V2R Convergence, V2R Responsiveness/Effectiveness, its QMS enabled diagnostics, and rating of quality levels

The following overview/questions/empirical studies review as to whether the RS&A-PI group is delivering for a Line icon based SMART RS&A Packaged/Regular RS&A V2R roadmap and associated QMS enabled DPD diagnostics today.

The points being discussed can also help the RS&A-PI management assess any lacunae.

RS&A V2R PROJECT CENTRE DETAILS

Does the RS&A-PI group have any SMART RS&A Package/Regular RS&A V2R QMS policy, and methodology or tool to

1 Review its RS&A management system documents including the availability of standard operating procedures to improve effectiveness, responsiveness, quality and RS&A-PI cost management? Yes/No/Not applicable

•2 Review its RS&A quality specific documentation to have a better understanding? Yes/No/Not applicable

•3 Carry out inspections of the SMART RS&A Packaged/RS&A V2R lifecycle, facilities, location, drive/hybrid landscape experience in real time circumstances and to have a better knowledge of drive/hybrid landscape performance dimensioning? Yes/No/Not applicable

•4 Review and improve methodology to be adopted for SMART RS&A Package/Regular RS&A V2R effectiveness, responsiveness, and quality assessment? Yes/No/Not applicable

•5 Review and check the preparedness of the SMART RS&A Packaged/Regular RS&A V2R engineering team/ EOCC team to work out issues/requirements? Yes/No/Not applicable

•6 Review the scope of RS&A quality management methodology to ascertain the requirement of the number of RS&A-PI(s) / SMART RS&A Package/Regular RS&A key considerations to be met? Yes/No/Not applicable

•7 Make clear to the SMART RS&A Package/Regular RS&A V2R engineering team, the EOCC team, the RS&A Analytics team, the RS&A V2R quality management methodology to be adopted? Yes/No/Not applicable

•8 Help the RS&A-PI group implement continual quality improvement? Yes/No/Not applicable

BEST PRACTICES FOR SMART RS&A AND EOCC STRATEGIES

45. Is the scope of SMART RS&A Package / Regular RS&A and/or EOCC services commensurate to the RS&A-PI services needed for the SMART RS&A Packaged/Regular RS&A V2R effectiveness?

Yes/No/Partially

46. Is the SMART RS&A Package / Regular RS&A and/or EOCC service infrastructure adequate to provide such a defined scope of services? Yes/No/Partially

47. Do adequately qualified and trained personnel perform, supervise and interpret SMART RS&A Package / Regular RS&A and/or EOCC strategies/essential incorporations/replacements/maintenance?

Yes/No/Partially

48. Do documented procedures guide the SMART RS&A Package / Regular RS&A EOCC /V2R effectiveness specific investigations/incorporations/replacements/ maintenance?

Yes/No/Partially

49. Are SMART RS&A Package / Regular RS&A VR effectiveness and/or EOCC resolutions done mostly within a best -practice time frame?

Yes/No/Partially

50. Are SMART RS&A Package / Regular RS&A and/or EOCC critical results for VR effectiveness intimated to the RS&A-PI personnel concerned? Yes/No/Partially

51. Are SMART RS&A Package / Regular RS&A and/or EOCC results reported in a standardized manner? Yes/No/Partially

52. Are SMART RS&A Package / Regular RS&A and/or EOCC evaluations/reports not directly interpreted within the immediate RS&A-PI group outsourced to other RS&A-PI groups based on their quality assurance programme? Yes/No/Partially

53. Is the SMART RS&A Package / Regular RS&A and/or EOCC quality assurance programme documented? Yes/No/Partially

54. Does the SMART RS&A Package / Regular RS&A and/or EOCC quality assurance programme address the verification and/or validation of QA methods? Yes/No/Partially

55. Does the SMART RS&A Package / Regular RS&A and/or EOCC quality assurance programme address the need to provide records for surveillance of repairs/incorporations/maintenance? Yes/No/Partially

56. Does the SMART RS&A Package / Regular RS&A and/or EOCC quality assurance programme include the periodic calibration and maintenance of all systems/equipment/devices? Yes/No/Partially

57. Does the SMART RS&A Package / Regular RS&A and/or EOCC quality assurance programme include the documentation of corrective and preventive actions for V2R effectiveness? Yes/No/Partially

58.a Is the SMART RS&A Package / Regular RS&A and/or EOCC quality assurance programme documented for all actions planned, actions revisited, or actions taken or not taken? Yes/No/Partially

58.b Is the SMART RS&A Package / Regular RS&A and/or EOCC quality assurance programme aligned with the RS&A-PI group's overall V2R effectiveness programme? Yes/No/Partially

59. Do written SMART RS&A Package / Regular RS&A and/or EOCC quality assurance procedures guide the handling and disposal of hazardous materials in any V2R experience? Yes/No/Partially

60. Are the SMART RS&A Package / Regular RS&A and/or EOCC personnel trained in effective, responsive and safe practices? Yes/No/Partially

61. Are the SMART RS&A Package / Regular RS&A and/or EOCC personnel provided with appropriate V2R engineering systems/equipment/devices? Yes/No/Partially

SMART RS&A PACKAGED/Regular RS&A related NORMS for V2R effectiveness

62. Is the scope of RS&A-PI services for the SMART RS&A Packaged/Regular RS&A V2R Effectiveness with related need for EOCC strategies commensurate to the RS&A-PI services expected? Yes/No/Partially

Do the RS&A-PI services comply with legal and other standardized requirements for controlling RS&A risk/hazard/incidence?
Yes/No/Partially

63. Are the SMART RS&A Packaged/Regular RS&A V2R effectiveness facilities adequate to provide such a defined scope of RS&A-PI services? Yes/No/Partially

64. Do adequately qualified and trained RS&A-PI personnel perform, supervise and interpret SMART RS&A Packaged/Regular RS&A/EOCC strategies/incorporations/replacements/maintenance?
Yes/No/Partially

Are the SOURCES OF strategic defects/variability possibly known for the V2R experience/DPD? Yes/No/Partially. Can Statistical Process Control help? Yes/No/Partially

Are the PATTERNS OF strategic defects/variability known for the V2R experience/DPD? Yes/No/Partially. Can Statistical Process Control functions help? Yes/No/Partially

65. Do documented policies and procedures guide identification and recording or reporting of SMART RS&A Packaged/Regular /V2R effectiveness assessments for RS&A-PI programmes?
Yes/No/Partially

66. Are results from the RS&A-PI programmes for V2R effectiveness available within a defined time frame?
Yes/No/Partially

67. Are critical SMART RS&A Packaged/Regular RS&A V2R effectiveness results intimated to the RS&A-PI personnel concerned so assistive planning can be done?
Yes/No/Partially

Are RSA-RCS specific Vehicle/Systems/Parts/Components Degradation Susceptibility Test (DST) results generated? Yes/No/Partially/Not applicable

68. Are SMART RS&A Packaged/Regular RS&A V2R effectiveness records reported in a standardized manner? Yes/No/Partially

Are important SMART RS&A Packaged/Regular RS&A V2R effectiveness records specifically tagged and thereon reported in a standardized manner? Yes/No/Partially/Not applicable

69. Are SMART RS&A Packaged/Regular RS&A V2R Assistive-System -Tests not available within the immediate RS&A-PI group outsourced to other RS&A-PI groups based on their SMART RS&A Packaged/Regular RS&A V2R quality assurance programme? Yes/No/Partially

70. Is the SMART RS&A Packaged/Regular RS&A - V2R Assistive-System-Tests quality assurance programme documented? Yes/No/Partially

71. Does the SMART RS&A Packaged/Regular RS&A V2R quality assurance programme address the verification and/or validation of specific methods or EOCC linked methods? Yes/No/Partially

72. Does the SMART RS&A Packaged/Regular RS&A V2R quality assurance programme address the surveillance of results as reports/data sets? Yes/No/Partially

73. Does the SMART RS&A Packaged/Regular RS&A V2R quality assurance programme include the periodic calibration and maintenance of all systems/ equipment/devices? Yes/No/Partially

74. Does the SMART RS&A Packaged/Regular RS&A V2R quality assurance programme include the documentation of corrective and preventive actions for V2R Effectiveness? Yes/No/Partially

75. Is the DPD / SMART RS&A Packaged/ Regular RS&A V2R programme specific (circumstances based hazards prevention & control) programme documented? Yes/No/Partially

76. Is the DPD / SMART RS&A Packaged/ Regular RS&A/V2R programme aligned with the RS&A-PI group's overall effectiveness, responsiveness and quality programme?
Yes/No/Partially

77. Do written procedures guide the RS&A personnel and EOCC team in their handling of possibly hazardous emissions/materials?
Yes/No/Partially

78. Are the RS&A personnel and EOCC team trained in responsiveness and effectiveness practices/measures?
Yes/No/Partially

79. Are the RS&A personnel and EOCC team provided with appropriate PPE/safety equipment/devices?
Yes/No/Partially

MANAGEMENT-ACCOUNTING AND RS&A-PI COST MANAGEMENT NORMS

The (subject of discussion) related dataset evaluations, V2R Effectiveness level questionnaires and empirical studies can help assess the impact of RS&A-PI Project Centric management-accounting for any SMART RS&A Packaged/Regular RS&A/ EOCC/DPD related V2R effectiveness or specific responsiveness and can help align RS&A V2R expectations with sustainable and continual Quality of strategy with RS&A-PI cost control.

Sustainable Quality of Strategy refers to the convergence seen between the vision, action planning and implementation of RS&A-PI /SMART RS&A Packaged/Regular RS&A/ EOCC/DPD methodologies with in-time responsiveness & supportive V2R engineering for the drive/hybrid landscape performance.

For improved responsiveness in the vision to reality for RS&A, the proposal also recommends the use of a NABL standards driven QMS system for Medical Devices and Equipment that can be used in a SMART RS&A Packaged/Regular RS&A V2R interactions & effectiveness and in connection with the RS&A Team/EOCC team/V2R engineering team and RS&A analytics team.

A first level version of the same is available and can be shared / discussed as needed.

Highlights of the RS&A intelligence and Continual quality improvement possible through Lean Six Sigma projects, assessments, tools and techniques of SMART RS&A Packaging - (At the PI organizational model level)

1. Code of SMART RS&A Packaging for V2R effectiveness (with focus for Package Design Validation & Analysis, PI Development and Testing of vehicles/systems, Hardware-in-the-Loop systems, RS&A Workflow Management Systems, RS&A Packaged V2R Lifecycle Management Systems, SMART RS&A PACKAGED QCDES Fitness Systems, RS&A PI Management Systems)
2. RS&A – V2R Evaluation Review Technique
3. Critical Interaction Leverage Management
4. RS&A - PI Issue Management
5. Critical Interaction/Behaviour Modeling
6. Critical Interaction/Dimensions Modeling
7. RS&A - PI Proportion Analytics
8. Future RS&A V2R Analytics
9. Future RS&A PI Analytics
10. Key Opinion Leadership and Empirical studies

RS&A Intelligence and Accountability

- AOEC finds that for effectiveness, a **5R**-Accentuated RS&A V2R workflow must define
- Critical interactions for inferable factors such as
- 1. The 5R DPD Landscape
- 2. The 5R DPD KRA(s)/KPA(s)
- 3. The 5R DPD Critical Interaction Zones
- 4. The 5R DPD Sampling elements
- 5. The 5R DPD & Data Set related effectiveness

RS&A Intelligence and Accountability

- RS&A V2R / DPD data sets and virtual POINT SLOPE INTERCEPTION can make it simpler to identify the tangible correlation between drive performance dimensions for a road / road system/ road network/hybrid landscape with the **5R**-Accentuated RS&A V2R workflows to help and improve effectiveness, responsiveness and accountability for targeted adaptability.
- This **5R**-Accentuated RS&A V2R workflow plus EOCC assisted effectiveness can
- Record-or-review,
- Relate to help and improve effectiveness and responsiveness ,
- Reduce risk,
- Respond and
- Regulate response for sampling elements that happen to matter for a road/road system/road network/hybrid landscape and its dimensions like the road surface, distance, drive time, drive safe and reliably factors, where there is agile point slope interception via strategic displays/condition monitoring/traceable fault tolerance/preventive and corrective action, where this effectiveness can help a RS&A Desk team categorize a RS&A V2R effectiveness index for a road/road system/road network/hybrod landscape/RS&A and EOCC radius, where the index can be simply (1), (2), (3), (4) or combinations of them

3

RS&A Intelligence and Accountability

- **(1) RS&AI1:=** where this workflow will need to address History of interaction & **Foreseeable needs for SMART RS&A packages / Regular RS&A V2R effectiveness**
- **(2) RS&AI2:=** this workflow will need to address **Critical Interaction Zone** needs forV2R...
- **(3) RS&AI3:=** this workflow will need to address **Road/Road system/Road network.hybrid landscape dynamics** forV2R...
- **(4) RA&AI4:=** this workflow will need to address **Advanced AGILITYneeds** (like air quality, rotational/unregulated acceleration, temperature/humidity, road or road system or road terrain or hybrid landscape degradations, with more than an expected RS&A driving style for effectiveness, responsiveness, reliability, and safety)

4

RS&A Intelligence and Accountability

- The RS&A V2R Effectiveness - Data Analysis Channel Building for a RS&A department/team, an EOCC assisting team, a V2R-engineering team and a V2R DPD Analytics team, and a RS&A Analytics team for new or revised vision to reality dimensioning of the needed SMART(ness for RS&A), will need to
- **1. Enable SMART RS&A Packaging for V2R effectiveness for a Case scenario specific category**
- **2. Develop SMART RS&A Packaging with EOCC channelization for assisting V2R lifecycles, workflows and teamwork**
- **3. Provide and utilize SMART RS&A V2R effectiveness/DPD sampling elements for RS&A improved planning/incorporation**
- **3. Manage / Innovate on SMART RS&A Packaging methodologies for dynamics experienced in V2R effectiveness/responsiveness**
