An Initiative for Dataset Training

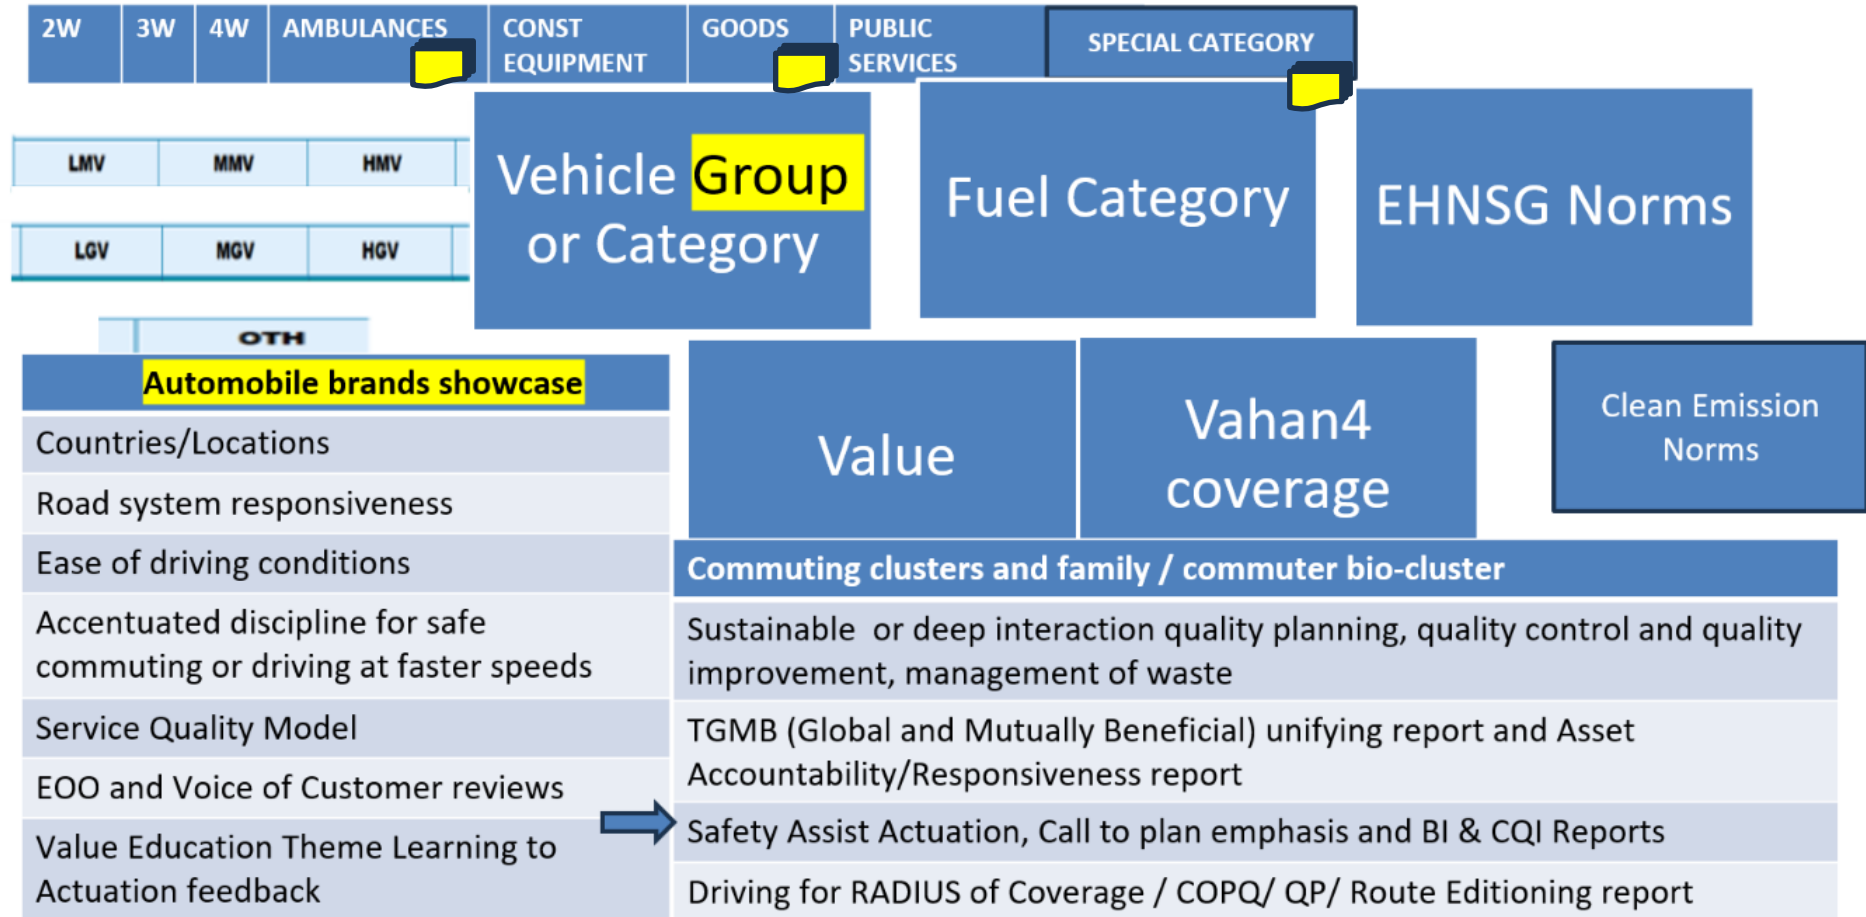

- **SMART RS&A-RCS Package theme learning to actuation assistance:**
- Relate to the quality of strategy for FES/FP&S/RS&S due to the conditions of our road systems and limitations for environmental control via SMART RS&A Package-projects enabled transformative surveys, assessments, and questionnaires “To Empower, To Engage and To Enable analysis and detailing of reports that can be submitted to the RTO, KSFES, Centre for SMART Governance, BBMP Road Infrastructure Projects, BBMP Traffic Engineering etc.
- **SMART Objectives of SMART RS&A Package-projects and any FCC based EOCC Linked RS&A Assist Programme**
- **1. Recognize the need via the multi-focused RS&A-RCS package-study**, to help the dynamics afflicted-hour-glass for safe and sustainable Responsive services & assistance/FES/FP&S
- **2. Review & insightfully improve the Quality of Strategy via** transformative knowledge, and
- Training/testing/deprecating package-priority modules for Responsive services & assistance/FES/FP&S **in multi-focused RS&A-RCS study**
- **3. Participate as per RS&A-package-domain classifications** in SMART RS&A-RCS Theme based surveys, assessments, questionnaires and influencing report detailing to help target decision makers hybridize or unify solutions for FES/FP&S/RS&A

An Initiative for Dataset Training

- **SMART Objectives of SMART RS&A Package-projects and any FCC based EOCC Linked RS&A Assist Programme**
- **4. Relate to the instrumental culture of the RS&A Suraksha Programmes for FES/FP&S/RS&A**
- **5. Use emerging technologies like the RS&A package** Deep interaction/ Deep learning to help EHNSG roadmaps, where EHNSG:stands for Environment Health National Safety Goals
- **6. Help NEXT / YOUNG GENERATONS assist and transform “EHNSG issues or TMS studies by enabling RS&A Suraksha Programmes proposals / solutions”** from being policy based,
 - corporate based or department based to Analytics for profile and process Improvement.
 - TMS: stands for Time Motion Scale
- **7. Innovate via the RS&A Suraksha Programmes for Climate change or Global Warming related cost of quality / poor quality in RS&A/FES/FP&S,** using people-groups/limited Suraksha groups from different case scenario classifications
-

An Initiative for Dataset Training

Vehicle Learning for automobiles and brands

An Initiative for Dataset Training

- **Virtue in designing a NSSR Academy for achieving Deep interaction Juran Trilogy expectations**
- The Raste Suraksha Samagraha or any dashboarding for road safety can be assisted by Automobile dealerships (as a Time Motion Scale (TMS) project)
- The choice of a vehicle or its Assisted or active safety systems can be interactively included by Vehicle Learning for Quality of Life (as a Climate Change Mitigation & Adaptation (CCMA) insight)
- Prefatory review / Uni-brand recreation of a vehicle specification sheet can be supported further via a Deep Interaction Link Sheet for Safety Assist Incorporations/Actuations
- Concerns about dashboarding for road safety can be escalated to the Automobile Dealership Association and the Automobile Manufacturer or the NSSR Academy for roleplay or actuation for solution finding
- Diversity in performance, safety, or mobility expected or experienced can be dash-boarded and instantiated via Deep Interaction Juran Trilogy Links
- Safety Assist Actuation or Forward Lifetime Theory (FLT) Actuation can be a uni-brand principle or proactiveness for TGMB (Global and Mutually Beneficial) brand unification
- The Voice of the Customer workflow need not be the only evincing need or recommendation option, there can be Value Theme Learning to Actuation (VTL2A) projects and deep interaction learning attributes
- Asset Accountability of a vehicle/model/variant and responsiveness for Ease of ownership can be FLT or TMS related

An Initiative for Dataset Training

Known dynamics influencing the NSSR Academy's Theme of Transformative and Accountable Road Safety or VETL2A expectations for Emergency / Ambulance Services by road systems:

- ☐ Problems due to older road systems/ road infrastructure
- ☐ Problems due to lack of insightful conformance or less-unified -effort by building/site/plot owners/associations along the road systems known to be used in Emergency services
- ☐ Problems due to lack of NSSR Academy Theme based landscaping/route editioning of roads/road systems/routes known to be used in Emergency services
- ☐ Problems due to lack of people interest for Essential Adherence for Guidance/Control/ Accountability for improved conformance for NSSR Academy Theme based landscaping/route editioning of buildings/ plots/sites/public services Infrastructure on roads/road systems/routes known to be used in Emergency services

An Initiative for Dataset Training

SMART RS&A PACKAGING PROJECT / PROGRAMME DETAILS

Programme Proposal	Details / Associated RS&A Dataset assistance	Remarks
Training for FES/FP&S Incorporation and Review with maintenance of training/testing/deprecated fire performance data	Yes/No/Not applicable	SMART City and SMART RS&A planning
Empirical studies for pin-coded FES/FP&S Incorporation and Review with maintenance of training/testing/deprecated Civic Amenity data	Yes/No/Not applicable	SMART City/Ward and SMART RS&A planning

An Initiative for Dataset Training

SMART RS&A PACKAGING PROJECT / PROGRAMME DETAILS

Programme Proposal	Details / Associated RS&A Dataset assistance	Remarks
Case studies for site specific FES/FP&S Incorporation and Review with maintenance of training/testing/ deprecated RADIUS of Coverage data	Yes/No/Not applicable	SMART RS&A planning
SMART World Assurance / Association for FES/FP&S Incorporation and Review maintenance of training/testing/ deprecated Future Forward Contracting data	Yes/No/Not applicable	SMART Quality of FES/FP&S strategy
